ABOUT ME

Introduce I am Mochammad Arif Rizki, now I have studied IT self-taught as a Programmer and Networking and Bug Hunter for 1 year longer, I have studied and explored the world of IT, Have a desire to learn something new. Even though my experience in IT is still new, I will continue to explore and explore more. Therefore, I am looking for experience in the company you are currently leading, to increase my skills and knowledge, or form a contribution. By having an interest in learning and growing in that area, and ready to try new challenges.

this thing is now probably very attached to me personally. Because I have a very high curiosity. I often spend my time doing whatever I think can take up my spare time. Currently, I often attend webinars, training, workshops, in various free or open sources guided by professionals who are experts in their fields. Through this class, I can discuss directly about the topics presented by the experts, including skills development in the work environment.
